MCCG146 – CPT and HCPCS Level II Coding Portfolio Project Coding Template

Module 3: Jane Smith's Physician Office Visit

CPT E/M Code(s):	
Reflection/Method on Code Selection – Describe in detail the steps/method you have taken to ensure you have coded this patient encounter properly	

Module 4: Jane Smith's Imaging Services

CPT Code(s) for Imaging Services:	
HCPCS Code(s) for Injection Agent:	
Using Medicare's website, determine whether or not the CPT has an active LCD or LCA based on the CPT Imaging code assignment. Does the Imaging Procedure CPT code you selected have an active LCA/LCD? Identify Article.	
Reflection/Method on Code SelectionDescribe in detail the steps you have taken to ensure you have coded this patient encounter properly	

Module 5: Jane Smith's Pre-Op Lab and EKG and Outpatient Surgery

CPT Code(s) for Surgeon's Services Outpatient Surgery:	19307-LT
CPT Code (s) for Pre-Op Lab and EKG Services	935005, 85014, 80053, 87635, 85014
Provide CCI Code Pair Edit (PTP) for Lab Codes	85014 and 85025 are the two codes that CCI CODE PAIR EDIT (PTP). I found this information in our week 5 notes that was shown to me in our Live meeting last night, and it reminded me how to get access to it.
Reflection/Method on Code Selection Describe in detail the steps you have taken to ensure you have coded this patient encounter properly	I re-read the operative notes, and I reviewed the questionnaire. I did some re-evaluating of the outpatient surgeon's services for surgery and went back and looked into the index for mastectomy, including axillary lymph nodes. I first seen the code 19302, so I turned to page 111, and seen that it wasn't what I was looking for. Then I kept looking at the other codes following it and seen code 19307-Mastectomy, modified radical, including axillary lymph nodes with or without pectoralis minor muscle, but excluding pectoralis major muscle. Then my next step was to find the services ordered. I realized they didn't have a preoperative package, and everything had to be ordered separately. First, I looked up ECG (tracing only) in the index and it gave me code 93005, so I went to page 757 and the code stated ECG tracing only without interpretation and report. Then I started to look up the blood work. I looked up the cbc with platelet and differential panel, and in the index, it gave me the code 85025, so I went to page 664 and found that it was exactly what I was looking for. Then I looked up the comprehensive metabolic panel in the index, and it gave me code 80053, and I went to page 596 and I found it was the right code. Then I went to the index and I found the code for Covid screening (amplified Probe Technique) 87635, and I found that on page 682. Then I looked in

Module 6: Jane Smith's Consultation and Office Procedure

CPT E/M Code(s):	
O	
HCPCS Supply Code (s) if applicable	
Reflection/Method on Code Selection – Describe in detail the steps you have taken to ensure you have coded this patient encounter properly
