Hello, and a good day to the Hiring Manager: Mrs. Susie Smith,

My name is Michael Blackman, and I am interested in the entry-level (Medical Coding Specialist) position you have available. Currently, I'm enrolled at Bryant & Stratton College, learning how to accurately code outpatient diagnoses and procedures utilizing the International Classification of Diseases. Clinical Modification (ICD-10-CM) and/or the Current Procedural Terminology (CPT) and HCPCS Level II coding systems. Understanding how to assign ICD-10-CM, CPT, and HCPCS codes in the proper sequence for accurate coding is something that I enjoy.

Being that I chose this profession as a career, gives me great excitement and anticipation to know that I will be giving my knowledge and expertise to a company for the sole purpose of increasing their company value. The level of energy I have is one of my best characteristics to help maintain a level of excellence when reporting ICD-10-CM / ICD-10-HCPCS

/ CPT Codes.

Let's say, I am a stickler for details, and I love the idea of team concepts, working and figuring out how to best serve our employer. Finally, I'm always thinking in terms of continuous development towards translating my college-learned skills over into the workplace.

I'm excited for the opportunity to be a part of the Ion Specialty Care Team.

.

First name: Michael

Last name: Blackman

In earnest, I desire to bring value and skills to The Ion Specialty Care Company in return for being allowed to do what I love, "Medical Billing and Coding." Setting my sights on high standards, and the best quality of care for the patients, as well as my employer, which is why I chose this company to dedicate myself to performance-driven ethics geared towards the health and wellness of "Ion Specialty Care."
